**POLITICAL MAP OF BARANGAY ALNO**

Prepared by: MPDO La Trinidad under CBMS project, 2013

Republic of the Philippines  
Province of Benguet  
Municipality of La Trinidad  
**BARANGAY ALNO**

***Political Subdivisions and Land Area***

The barangay is subdivided into 13 major sitios namely: Obudan, Roadside, Payew, Central Alno, Riverside Alno, Doakan, Mati-e, Taytay, Ongasan, Peril Alno, Bekes, Conig, and Induyan.

The DENR cadastral survey shows that the barangay has an estimated land area of 958.3493 hectares representing 11.86% of the municipality's total land area. It is the third largest barangay in the municipality.

***Accessibility***

The barangay is accessible by passing through Alapang. Public Utility Jeeps from Baguio to Alno and town (km6) to Alno is available. You can also take taxi plying around La Trinidad. The Camp Dangwa-Alapang-Alno Provincial Road is paved. The barangay is located some three kilometers from the Municipal Hall.

**I. NATURAL AND PHYSICAL CHARACTERISTICS**

**Climate and Rainfall**

The barangay has an average temperature of 26°C at maximum and 16°C at minimum. It is classified under the type "A" climate having two pronounced seasons, dry from November to April and wet during the rest of the year.

***Topography and Slope***

Barangay Alno has slopes varying from zero percent and above. Based on ranking, the most dominant land area of Alno is hilly to mountainous with slopes ranging from 19% to 30%. This is followed by upland areas with slopes of 9% to 18%. Then rough mountainous area with slope of 31% to 50%. Next is the very steep and extremely rough mountainous area with slope of 51% and above. And the least is the plain/flat areas with a slope of 0% to 8%.

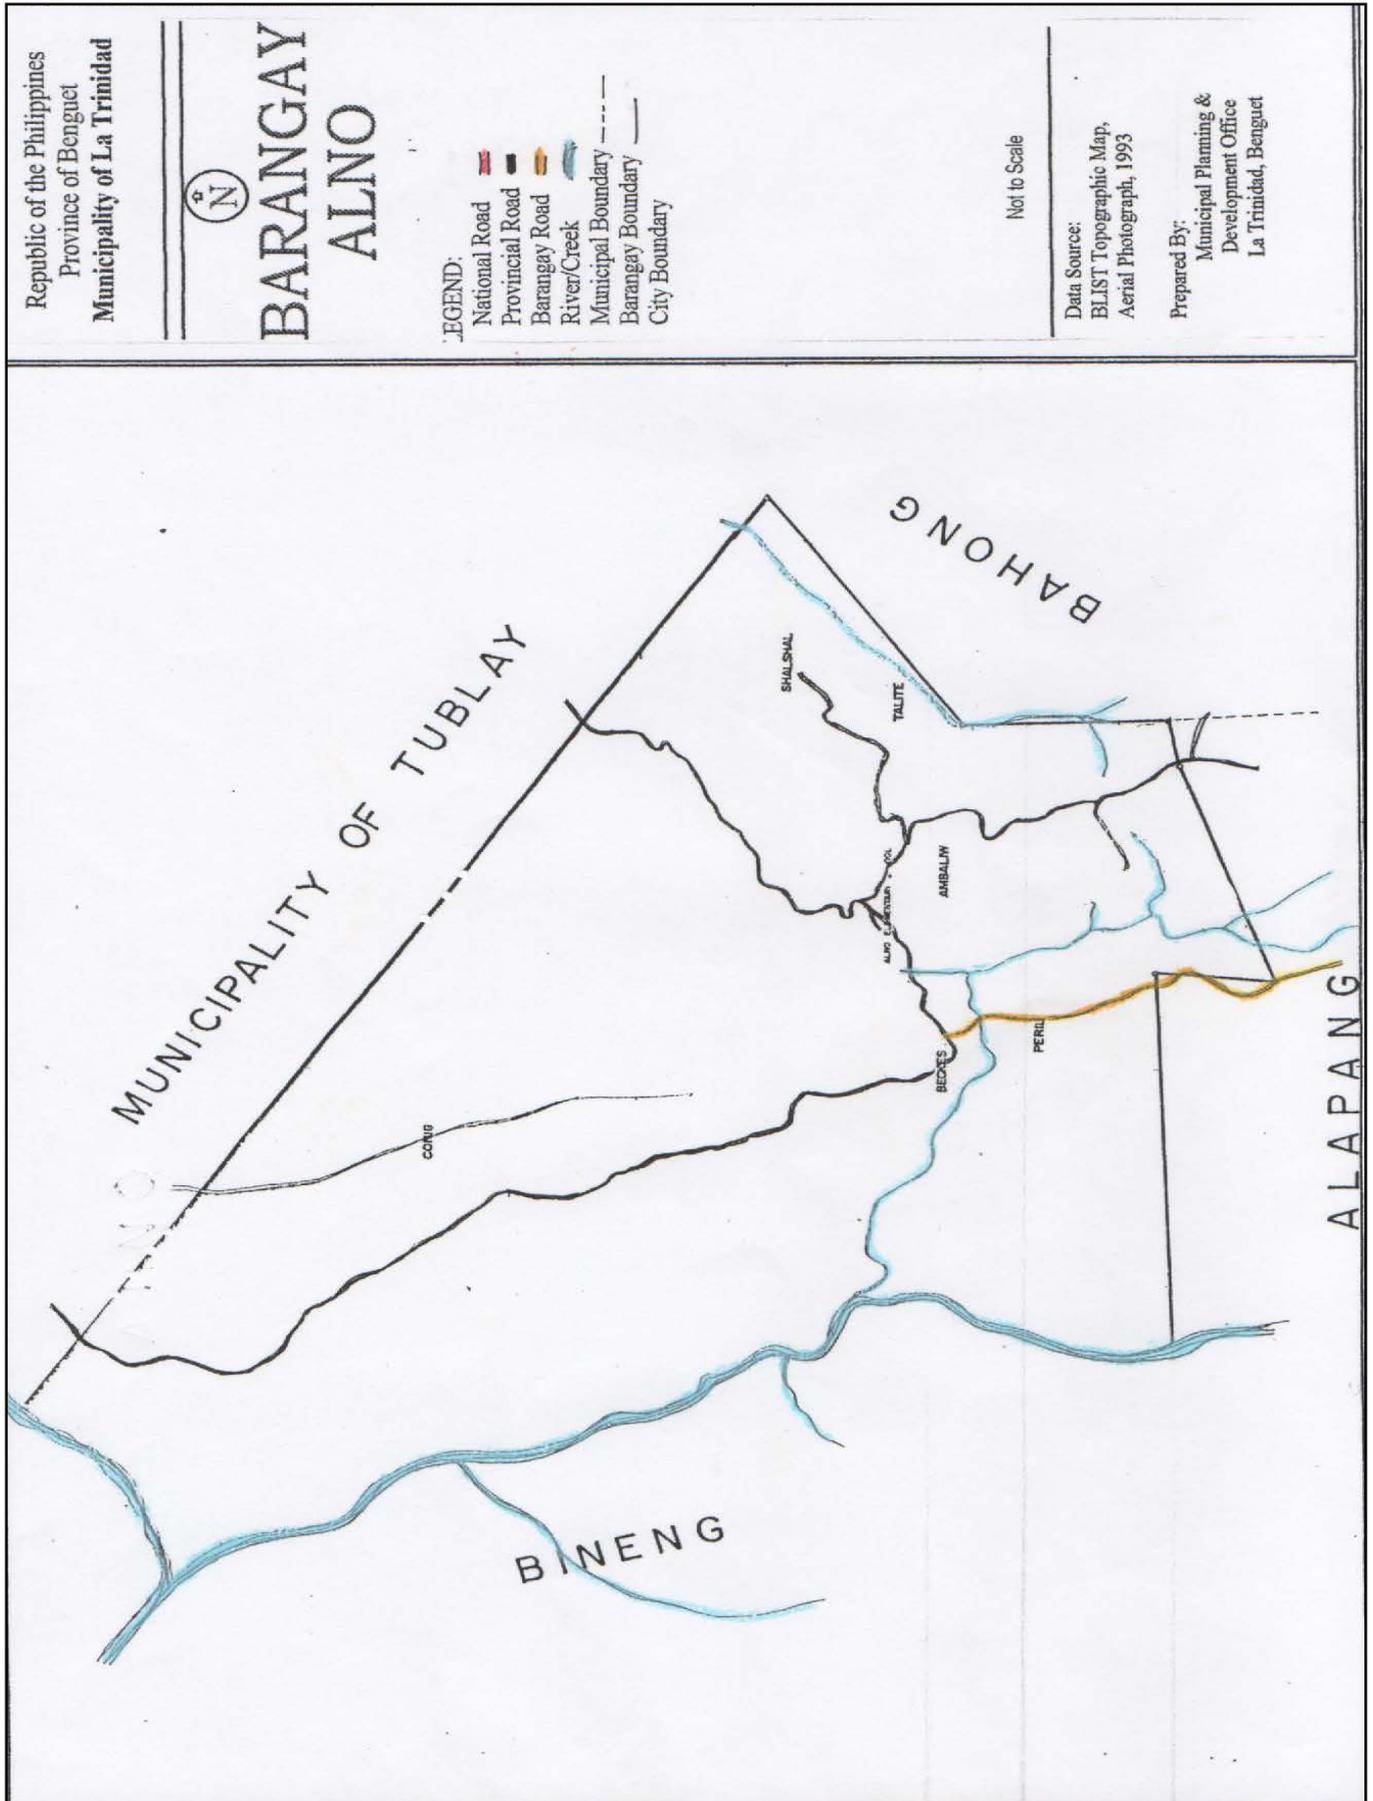

The elevation ranges from 900 to 1,400 meters above sea level.

<i>Topography</i>	<i>Slope (%)</i>	<i>Area (Has.)</i>
Plain/Flat Area	0 to 8	59.75
Upland Areas	9 to 18	297.86
Hilly to Mountainous Areas	19 to 30	357.33
Rough Mountainous Areas	31 to 50	178.76
Very Steep, Extremely Rough Mountainous Areas	51 and Above	119.00
<i>Total</i>		<i>1,012.80</i>

### **Density and Classification**

The population density in Alno increased from 1.23 persons per square kilometer in 1990 to 1.47 in 1995, and 1.80 in 2000. Between 2000 and 2007, its population density increased to 1.90 and 2 persons per square kilometer in 2010. Alno is still a rural barangay based on the derived density from 1995 to 2010.

#### *Population Density (Persons per Square Km)*

Census Year	1990	1995	2000	2007	2010
Density	1.23	1.47	1.80	1.90	2

Source: La Trinidad Physical & Socio-Economic Profile 2011

### **Population by Sex & Age Group**

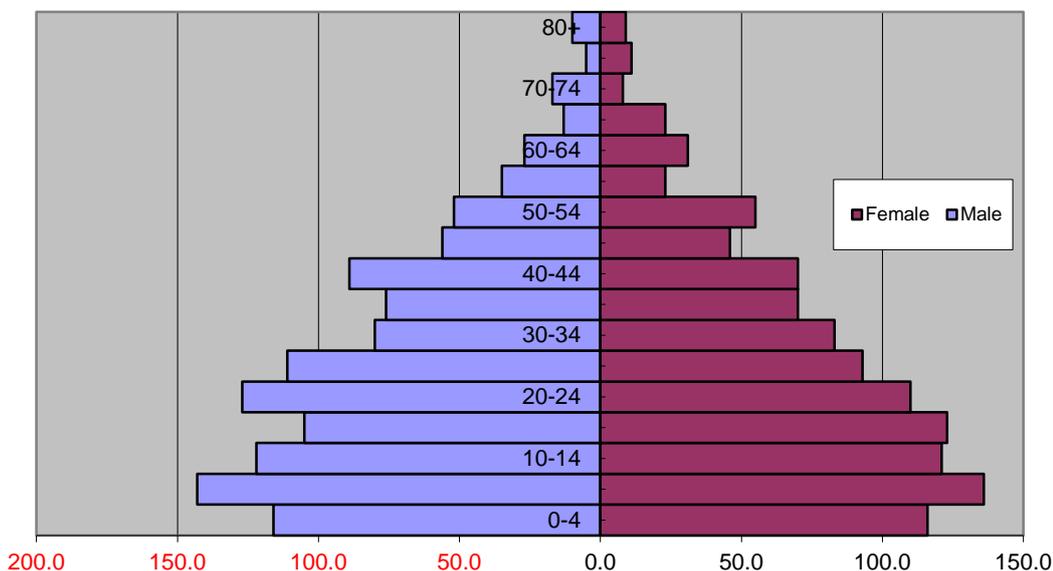

Based on age-sex pyramid, males in 5-9 age brackets have the greatest number having 143 or 6.19% of the total population. Females from 5-9 age brackets have the highest population from the female age group having 136 or 5.88%. The total sex ratio is 105% which means that for every 100 females, there are 105 males. Age bracket 0-4 has equal number of males and females, wherein the sex ratio is 100%.

A ratio greater than 100% indicates that male population is predominant over female population. This can be seen in age brackets 5-9, 20-24, 25-29, 35-39, 40-44, 45-49, 55-59, 70-74 and 80 & over. While in age brackets 15-19, 30-34, 50-54, 60-64, 65-69 and 75-79 shows that females have predominance population except in age bracket 0-4 which was equal.

## **V. GOVERNANCE**

### ***Vision***

A mentally-fit, educated, developed, peaceful and healthy God-loving citizenry living in a well-secured and progressive community, working together with the Barangay Government towards development.

### ***Mission***

Coordinate with all sectors of the society in identifying projects and programs that leads to people empowerment, which is the baseline of the community development. Coordinate with other line agencies for fund and technical assistance not found in the community and extend assistance, which are available materials found in the Barangay Government and the community in general.

### ***Goal***

To produce high quality of vegetables and root crops, competitive varieties of cut flowers and large numbers of livestock in becoming a community of self-reliance and self-sustaining.

### ***CBMS Indicators of Poverty***

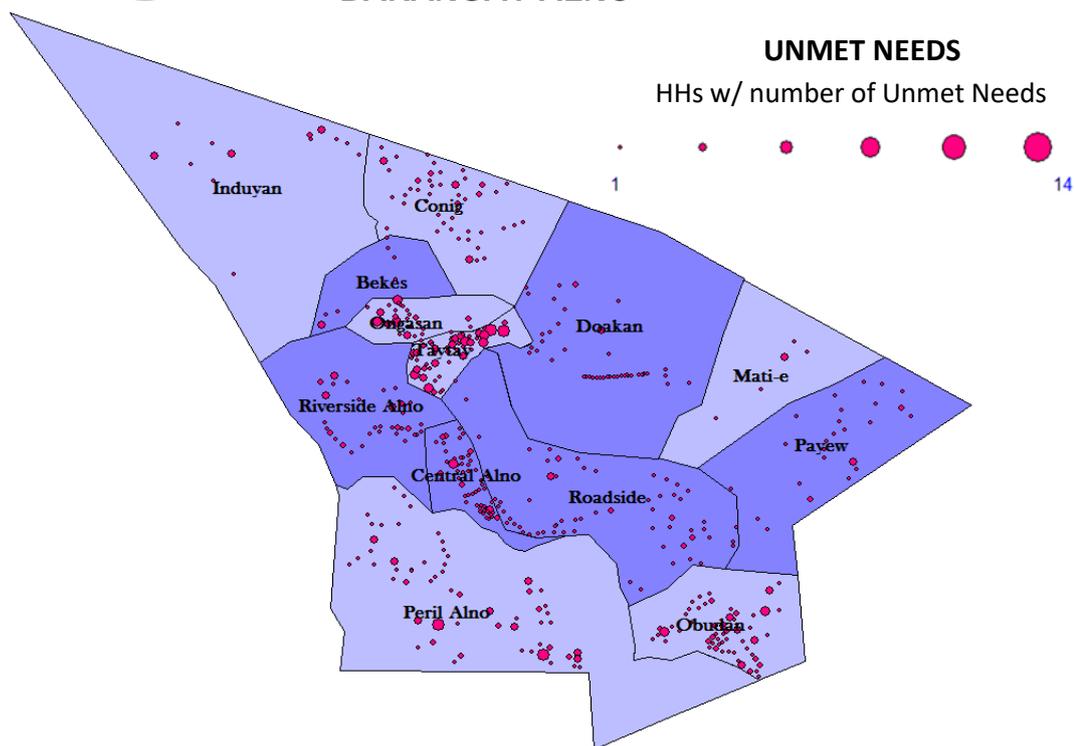

The most felt problem in Barangay Alno is access to safe water. Most of the affected households are located in Conig having 44 households, Taytay with 41, Peril Alno with 38, and Obudan with 33 households.

Another felt problem among the residents of Alno is low income, where a total of 90 households were affected. Some 17 households were in Taytay, 14 households in Obudan, and another 14 households in Peril Alno.

There were 48 households who are affected by income below food threshold. Most of them are in Taytay with 10 households, Peril Alno with another 10 households and Obudan with 7. Food threshold is the minimum cost of food requirements.
