Land Area

The DENR-Cadastral Survey (Lot 1024-D) shows that Alapang has a total land area of 201.22 hectares, representing 2.49% of the total municipal area. It is the 5th smallest Barangay in La Trinidad.

Political Subdivisions

Alapang is one of the barangays of the Municipality of La Trinidad, Province of Benguet. It has five (5) sitios namely: Samoyao, Alapang Proper, Dapiting, Ettong and Camp Dangwa.

Accessibility

Barangay Alapang is accessible by passing by barangay Cruz via Baguio-Bontoc National Road. The barangay is about 2 kilometers away from the Municipal Hall. Public utility vehicles are available.

II. NATURAL AND PHYSICAL CHARACTERISTICS

Climate and Rainfall

The average temperature in Alapang ranges from 16 to 20 degrees centigrade. The coldest months are from December, January and February.

It has two pronounced seasons, dry and rainy. Rainy days are usually from May to September with August being the wettest month with an average rainfall of 1 meter. It is dry during the rest of the year.

Topography and Slope

Alapang is generally hilly to mountainous from gentle slopes to very steep slopes ranging from 18° to 30°. Elevation ranges from 900 to 1,400 meters above sea level.

Soil Type

There are two types of soil in the barangay namely: loam and coarse loam, the so-called Puguis gravelly loam and Bineng loam are found in the area and offers good to excessive drainage. These types of soil are suitable to a wide variety of vegetables and fruit crops including cut flowers.

Republic of the Philippines
Province of Benguet
Municipality of La Trinidad
BARANGAY ALAPANG

Water Bodies

There are two (2) common springs and one (1) creek, named Alapang Creek. Alapang Creek drains from the Busol Watershed from barangay Ambiong. Water from Alapang Creek comes from the Balili River through the Bahong caves. Water from the Alapang Creek finally joins the Payeng River which drains down the Lingayen Gulf. The creek serves as drainage and source of irrigation water.

Land Use

The barangay of Alapang has a total land area of 201.22 hectares which is presently used as follows:

Agriculture. A total of 23.64% hectares is devoted to agricultural activities such as farming of vegetables, cut flowers, fruit crops and livestock and poultry raising.

Forest. Land areas having 40° and above slopes are classified as forest areas. The Alapang Communal Forest covers an area of 73.92 hectares.

Commercial. The commercial land covers an area of 11.57 hectares.

Road. The road covers an area of 11.25 hectares.

Residential. The residential area covers an area of 10.28 hectares.

Institutional. The institutional land covers an area of 2.58 hectares.

BARANGAY ALAPANG

Population by Sex & Age Groups

Females aging 15-19 have the greatest number, representing 6.02% of the total population. Males ageing 10-14 have the highest population in the male group, representing 5.70% of the total population.

The total sex ratio was 103% which means that for every 100 female, there are 103 males. The age group 75-79 shows that the sex ratio is 100%, which indicates that there were equal numbers of males to females.

A ratio higher than 100 indicates that there is predominance of the male population as can be seen in the age groups 0-4, 5-9, 10-14, 25-29, 30-34, 35-39, 40-44, 50-54 and 65-69. While in the age groups of 15-19, 20-24, 45-49, 55-59, 60-64, 70-74 and 80 and above, there were more females than males. Only for the age groups 75-79, do we find the equal male population to the female population.
