Riverside	Road	PUJ-10.00 Taxi-68.00	PUJ/Taxi	Regular
Gulon	Road	PUJ-12.00 Taxi-105.00	PUJ/Taxi	Regular

## **II. NATURAL AND PYHYSICAL CHARACTERISTICS**

### ***Climate and Rainfall***

The barangay has temperate climate. It has an average temperature of 26°C at maximum and 16°C at minimum. It has two pronounced seasons, dry and rainy. Rainy days are from May to September with August being the wettest. It is dry from the rest of the year.

### ***Topography and Slope***

The topography is characterized by steep mountains and high terrain. The dominant land area of Ambiong is mountainous. It is characterized with slopes ranging from 19% to 30%. This is followed by upland areas with slopes of 9% to 18%. To the east is a mountain slope above sea level.

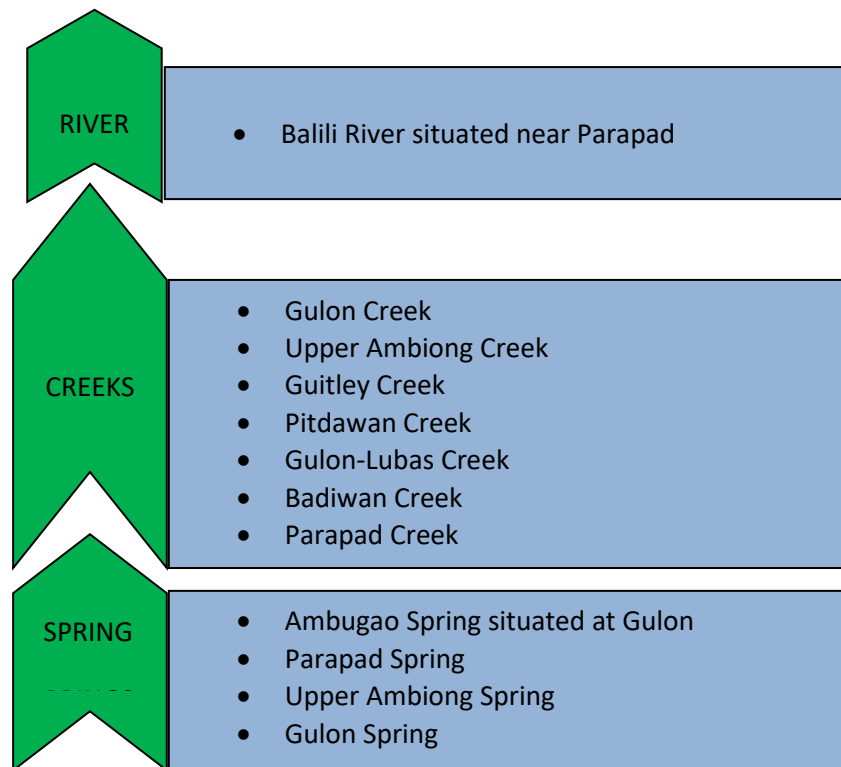

### ***Soil Type***

There are two types of soil existing in the barangay namely: loam and sandy loam. These are Tacdian loam and Bakakeng loam. The Tacdian loam is very critical to soil erosion. External drainage is good to excessive. Internal drainage is moderately slow. Moreover, great care should be applied to the Bakakeng sandy loam to minimize erosion.

**Water Bodies**

Figure shows that Barangay Ambiong with various water sources has an abundant water supply that could cater to the needs of the community. It has 7 creeks and 4 water springs. The water springs mainly the Ambugao Spring is the major water source supplying sitio Central, Botiwitiw, and Riverside. Although majority of the community members avail of the services of the La Trinidad Water District, some still prefer to use water from the spring source.

**Existing Land Use**

The Busol Watershed is the predominant land use in the barangay. The specific land uses are as follows:

<i>Land Use</i>	<i>Areas in Hectares</i>	<i>Percentage</i>
Watershed	189.21	55.32
Agricultural	140.50	41.08
Residential	11.70	3.42
Institutional	0.62	0.18
<i>Total</i>	<i>342.027</i>	<i>100.00%</i>

**Population by Sex and Age Groups**

Females in age group 20-24 have the greatest number, representing 5.88% of the total population. This is followed by males in the age group 5-9 with 318 or 5.85%.

The total sex ratio was 102%, indicating that for every 100 females, there are 102 males. For age group 80 years old and above, the sex ratio is 100%, which means that male population is equal to female population.

A sex ratio higher than 100 indicates that there is predominance of the male population over female population. This can be seen in age groups 0-4, 5-9, 10-14, 15-19, 30-34, 35-39, 40-44, 50-44, and 75-79. For age groups 20-24, 25-29, 45-49, 55-59, 60-64, 65-69, and 70-74, female population is predominant over male population. As for age group 80 and above, male population is equal to female population.
